DETAILED ACTION

1. The 102/103 rejection over Nahass et al. in the first office action is withdrawn in view of applicant's arguments in the paper filed 20 June 2003.

2. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

3. Claims 1-4, 7-11, 13-16, 18-55 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-5 of copending Application No. 10/005,621. Although the conflicting claims are not identical, they are not patentably distinct from each other because the claims of the allowed sister application claim a carbon fiber filled polycarbonate tray for an MR head tray that

Art Unit: 1772

has a surface resistivity that overlaps the instant claims. The specification of 10/005,621 discloses that the embodiments and examples, which support the claims of the application, show low particle loss, low ion contamination and low surface variation as in the instant claims. It would have been obvious to one of ordinary skill in the art based on the examples and embodiments which support the claims in both the instant and '621 application that these claims cover overlapping subject matter. In particular instant claim 22 overlaps Example 1 of the '621 specification, which is embraced by claims 1-5 of the '621 application.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The reference is the printed application of the 10/005,621 application.

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to William P. Watkins III whose telephone number is 703-308-2420. The examiner works an increased flex time schedule, but can normally be reached Monday through Friday, 11:30 A.M. through 8:00 P.M. Eastern Time. The examiner returns all calls within one
